DESCRIPTION OF PROPOSED WORKS

We plan to pump between 2,000 and 3,000 g.p.m. from 5 wells on our own property. The water will be pumped to the mine townsite for domestic purposes and also to the plant for treatment of ore.

5. Estimated cost of works One hundred thousand dollars

6. Estimated time required to construct works six months

7. Remarks It is estimated that we will use for domestic and plant purposes a possible total of 4 second-feet. In order to hold water back from entering the open pit mining area it may be necessary to pump in excess of the above 4 second-feet. This excess may be carried in pipe to the Walker River in close proximity to the wells.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: source. It is understood that the 1.10 cubic feet of water per second herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use, it being understood that the water pumped for mine drainage in excess of actual consumptive beneficial use needs is to be considered as beneficial use. It further being understood that provisions must be made for diverting excess water to the Walker River and that accurate measurements be kept of water pumped and disposition thereof. The State retains the right to regulate the use of the water herein granted at any and all times.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.10 cubic feet per second.

Actual construction work shall begin on or before January 15, 1953

Proof of commencement of work shall be filed before February 15, 1953

Work must be prosecuted with reasonable diligence and be completed on or before January 15, 1954
